AUDIT

Usability

18 issues · 0 critical · 3 major · 15 minor · 0 suggestion

The website presents a modern, high-end aesthetic suitable for a construction firm, with strong imagery and a clear overall structure. However, usability is hampered by significant legibility issues in the hero section, inconsistent component design for project listings, and the presence of placeholder content that undermines professional credibility.

Typography 9

1. Body text is very small

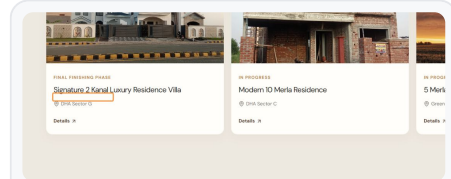

Major

Font size 9px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 9px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · medium

2. Body text is very small

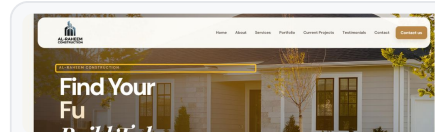

Minor

Font size 10px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 10px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

3. Body text is very small

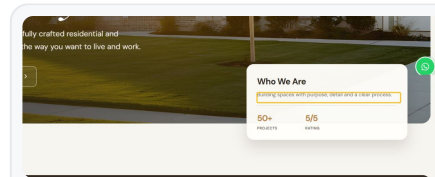

Minor

Font size 12px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 12px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

4. Body text is very small

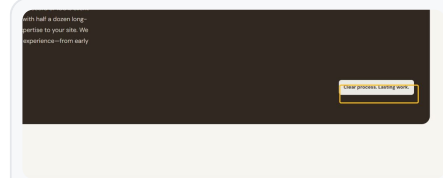

Minor

Font size 10px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 10px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

5. Body text is very small

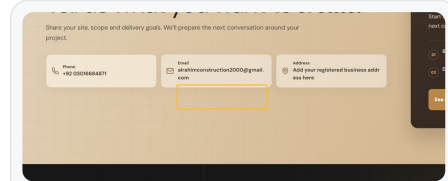

Minor

Font size 11px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 11px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

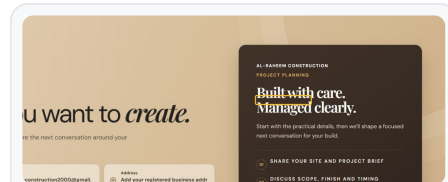

6. Long all-caps text

Minor

16 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

7. Body text is very small

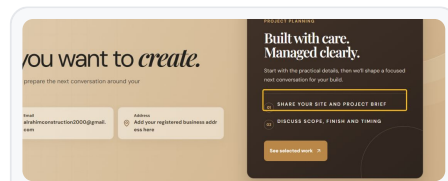

Minor

Font size 12px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 12px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

8. Body text is very small

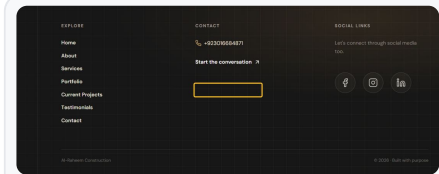

Minor

Font size 11px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 11px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

9. Body text is very small

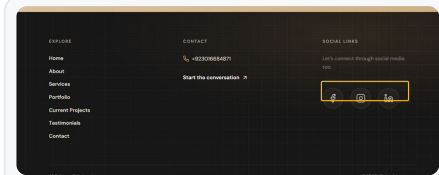

Minor

Font size 11px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 11px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

Imagery & icons 1

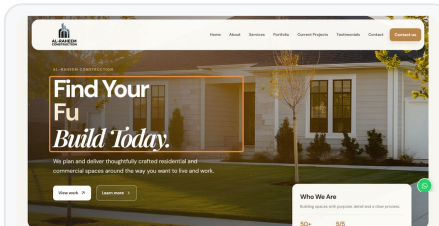

10. The word "Future" in the main H1 heading uses a highly stylized, thin script font that is nearly illegible against the background image. This obscures the primary value proposition of the site.

Major

"Find Your Future Space. Build Today."

TRY

Use a heavier weight for the script font or add a subtle text shadow/overlay to ensure the word is readable against all parts of the background image.

Captured on page · Major

State & feedback 1

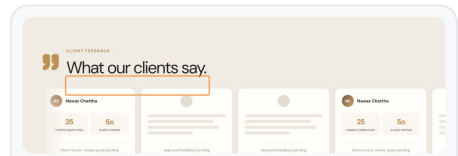

11. The testimonials section contains multiple placeholder cards with generic grey skeleton lines instead of actual client feedback. This gives the impression that the site is unfinished or broken.

Major

“What our clients say.”

TRY

Remove the placeholder cards and only display completed testimonials, or hide the section entirely until content is available.

Captured on page · Major

Consistency 4

12. No consistent type scale

Minor

21 distinct font sizes (aim 10 or fewer)

TRY

Define a fixed type scale (e.g. 12/14/16/20/24/32px) and map every text style onto it.

Found 21 distinct font sizes (a tidy interface usually stays under 10). Too many suggests no shared system and a less cohesive feel.

13. Too many text colours

Minor

24 distinct text colours (aim 12 or fewer)

TRY

Reduce text colours to a small token set — primary, secondary, muted, link, and state colours.

14. Inconsistent corner radii

Minor

14 distinct border radii (aim 6 or fewer)

TRY

Pick a small radius scale (e.g. 4/8/16px) and apply it consistently across components.

Found 14 distinct border radii (a tidy interface usually stays under 6). Too many suggests no shared system and a less cohesive feel.

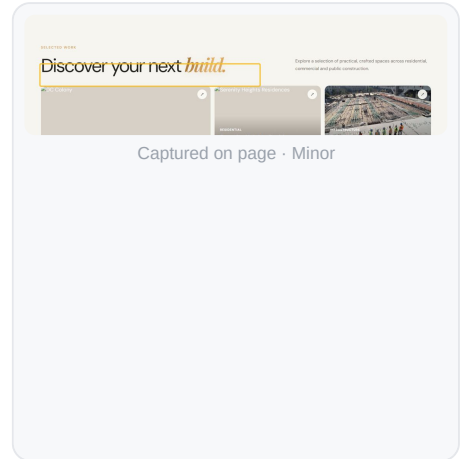

15. The site uses two completely different component styles for projects: image-only cards in the "Discover your next build" section and bordered cards with text below in the "Building right now" section. This inconsistency makes the interface feel fragmented.

Minor

"Discover your next build."

TRY

Adopt a single, unified card component style for all project listings across the site to improve visual harmony and predictability.

Grouping 1

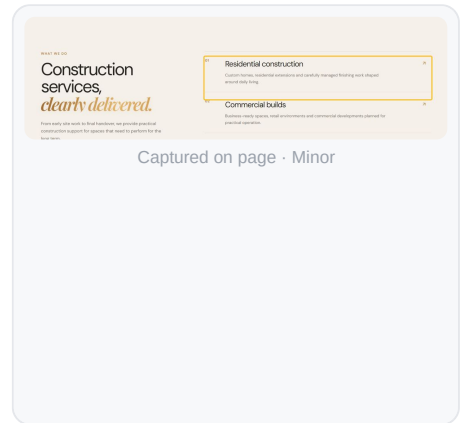

16. In the services list, the index numbers (01, 02, etc.) are horizontally detached from the service titles by a large gap. This breaks the visual association between the number and the content, making the list harder to scan.

Minor

"Residential construction: Custom homes,..."

TRY

Reduce the horizontal spacing between the index numbers and the service titles to create a stronger visual group.

Spacing & alignment 1

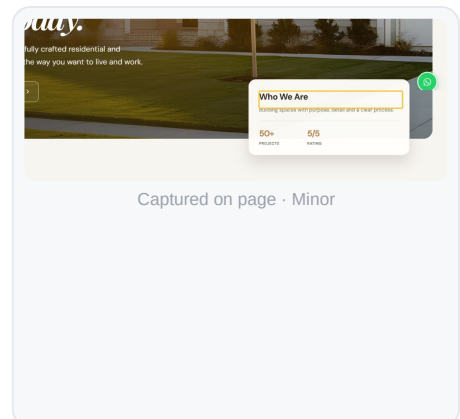

17. The "Who We Are" statistics card in the hero section is positioned awkwardly, floating without alignment to the main content grid or the section boundaries. This creates unbalanced whitespace and feels like an afterthought.

Minor

"Who We Are"

TRY

Align the card with the right edge of the primary content container or integrate it more naturally into the hero's layout grid.

Affordance 1

18. The project cards in the "Discover your next build" section rely on a very small, low-contrast icon in the top-right corner to signal interactivity. Users may not realize the entire image is a clickable button.

Minor

“View DC Colony details”

TRY

Add a hover effect (e.g., slight zoom or overlay) or a more prominent "View Project" button label to clarify that the cards are interactive.
